

Elite 303 Cabinet

The 19" Enclosure design had to come into line with the 21st Century technology it was housing, so when we were designing our Elite 303 Cabinet, we consulted our customers for their input and asked what they most wanted to see in an enclosure to ensure their demands were satisfied.

We canvassed our customer base from businesses right through to multinational companies, installer, internet service providers (ISP's) and system integrators for their contribution in the design for our new cabinet range.

Their ideas and requirements had a direct and positive effect on the final design and construction of what was to become the Elite 303 Cabinet.

3 into 2

Unique 3 into 2 solution Three 19" bays in two cabinets 800 wide only
